DETAILED ACTION

Applicant's election of claims 43-81, species 1, SEQ ID NO:1 and 2, in paper of 07/02/07 is acknowledged.

After review and reconsideration, the restriction requirement of 04/12/07 is vacated and replaced with the following new restriction requirement.

Election/Restrictions

Claims 43-81 are pending and are subjected to the following restriction requirement.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 43-60, 62-81, drawn to a method for treating breast cancer, using an antibody to SEQ ID NO:2.

Groups 2-10, claim(s) 43-60, 62-81, drawn to a method for treating a colorectal cancer cell, a lung cancer cell, an ovarian cancer cell, a central nervous system cancer cell, a liver cancer cell, a bladder cancer cell, a pancreatic cancer cell, a cervical cancer cell, a melanoma cell, or a leukemia cell, using an antibody to SEQ ID NO:2. A method for treating each cancer constitutes a single, distinct invention.

Art Unit: 1642

Group 11, claims 43-81, drawn to a method for treating glioma, using an antibody to SEQ ID NO:2.

Groups 12-21, claim(s) 43-60, 62-81, drawn to a method for treating a breast cancer cell, a colorectal cancer cell, a lung cancer cell, an ovarian cancer cell, a central nervous system cancer cell, a liver cancer cell, a bladder cancer cell, a pancreatic cancer cell, a cervical cancer cell, a melanoma cell, or a leukemia cell, using an antibody to SEQ ID NO: 4. A method for treating each cancer constitutes a single, distinct invention.

Group 22, claims 43-81, drawn to a method for treating glioma, using an antibody to SEQ ID NO:2.

The inventions are distinct, each from the other because of the following reasons:

An international stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. When claims to different categories are present in the application, the claims will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories: (1) A product and a process specially adapted for the manufacture of said product; or (2) A product and a process of use of said product; or (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or (4) A process and an apparatus or means specifically designed for carrying out the said process; or (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application will be considered as the main invention in the claims, see PCT article 17(3) (a) and 1.476 (c), 37 C.F.R.

1.475(b) and (d). Group I will be the main invention. After that, all other products and methods will be broken out as separate groups (see 37 CFR 1.475(d).)

Group 1, claims 43-60, 62-81 forms a single general inventive concept.

Groups 2-11 are additional use of the antibody to SEQ ID NO:2 of group 1. Groups 2-11 are distinct from each other, because they do not use the same products, i.e. treating different population of patients having different cancers.

Groups 12-22 do not share the same technical feature of group 1, because the methods of groups 12-22 do not use the antibody to SEQ ID NO:2 of group 1. Groups 12-22 are distinct from each other, because they do not use the same products, i.e. treating different population of patients having different cancers.

Accordingly, Groups 1-22 are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
